

Urethroplasty Training Workshop, KCMC.

Date 10 – 15th of November 2024

Location KCMC, Moshi, Tanzania

Faculty Paul Anderson PA

Suzie Venn SV

Aim Increase surgical and management skills in Posterior Urethral injury for Dr Nico Ngowy

Increase use of buccal grafts

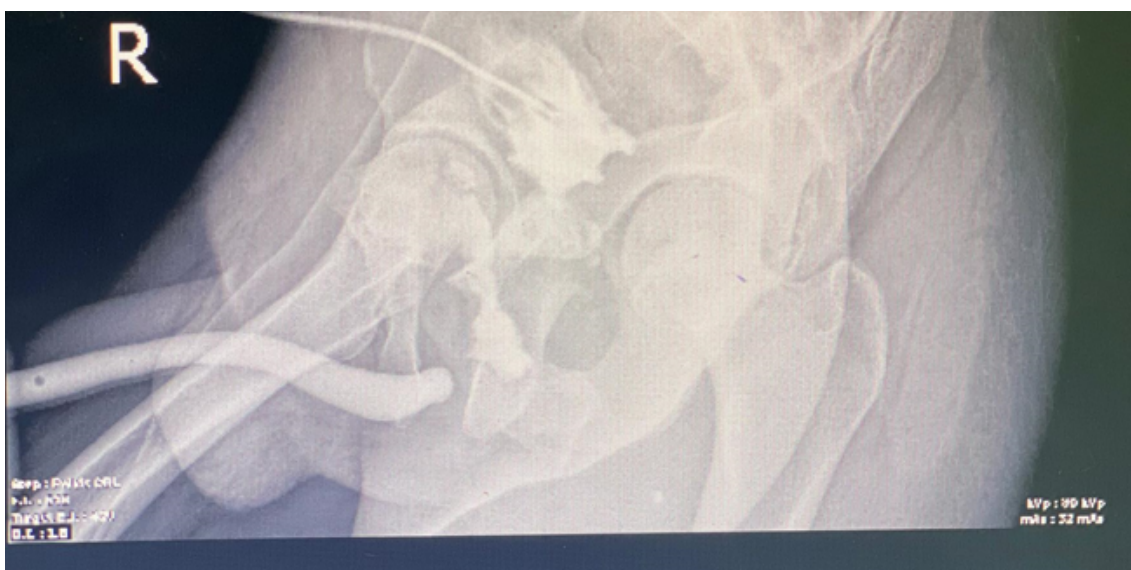

Prior to workshop - 30 cases with urethrograms were prepared by the team and shared on WhatsApp with the UK surgeons

Sunday 10th of November – PA and SV visited the hospital, conducted a pre-workshop ward round and agreed management of 20 cases for the week.

Monday – Friday – two theatres, all day.

Theatre 1 – Paul and Nico. More complex posterior urethral cases, to upskill Dr Nico

Theatre 2 – Suzie, Orgeness and Esther (local Consultants) – 3 anastomotic cases and 4 cases augmented with buccal grafts

Posterior Urethral Disruption injury with fistula

Successful week – 15 cases completed.

Future Paul committed to 3 further annual visits to continue Nico's upskilling.
 Suzie will continue to encourage and support the use of buccal grafts on
 next visits
